

Lilly pads Installation with Clay Turtles KB

Inspired by Jean Monet artwork 'Lilly pad bridge'.

1. Students use acrylic paint on paper in various shades of blue/ purple to create the base (water).
2. Then have students draw an oval on a new sheet of paper and paint it various shades of green.
3. Next, to create the flower have students use different shades of pink and red to paint a flower. Cut around the flower when done.
4. Once all three components are done, have students place some glue in middle of bottom Lilly pad and stick to the water.
5. Take a piece of pink crate paper and stick it roughly on the Lilly pad. Once this is stuck, stick flower on top so it is sitting a little bit higher off the Lilly pad.
6. Add the clay turtle when installation is ready.
